

# Adapted Version of the Rosenzweig P-F Test (PFS-AV)

Hornsveld, Nijman, Hollin, & Kraaimaat (2007)

Group: ..... Number: .....

Measurement: after intake/before treatment/after treatment/during follow-up

## **Introduction**

This questionnaire includes 12 images. It is the intention that you are viewing image for image and you put yourself in the place of the person to whom something is said. Then you can for each picture write down on the reply form how you would react in that situation.

For example, two men walking on the street and almost collide against each other. One man says to the other man "You did not watch out, you almost ran into me." Some people will respond by saying, "Excuse me, I was with my thoughts elsewhere." Other will shout: "Do you have sometimes shit in your eyes." How would you react in that situation?
